

I listen to K-LOVE on 88.1 Omaha, NE; an FM translator station. I understand that the FCC is proposing to expand LPFM to take priority over current FM translator service stations. I am against this proposal. 88.1 provides wholesome radio for myself and my children. I do not have to worry about what is said, or played, on this radio station. This station provides a great value to Omaha, NE; by supporting the family and those values. WE have plenty of radio stations that are only interested in making \$\$, and will do or say whatever on the air to earn those \$\$'s. I don't enjoy hearing those types of stations, and I know several other people in Omaha, NE agree with me on this issue. Please do not allow LPFM's to take priority over this station.
